10. (Currently amended) The ~~method~~ process of claim 1, wherein the sheet includes at least two areas include the customizable component area and further including:
separating the printed areas into respective pieces prior to combining locating both the customizable component piece and the with goods within a package; and
shipping the package, with the customizable component within the package, in accordance with the carrier waybill.

11. (Currently amended) The ~~method~~ process of claim 1, further including:
separating the printed areas into respective pieces prior to

~~combining a piece of the sheet comprised of one of the areas with goods in a package, and shipping the~~ a package and the waybill piece, but not all of the pieces, on an exterior area of the package.

12. (Currently amended) The ~~method~~ process of claim 2, further including:

~~combining a piece of the sheet comprised of one of the areas with goods within a package, and shipping the piece and the goods within the package separating the areas into respective pieces prior to shipping a package and the waybill piece, but not all of the pieces, on an exterior area of the package.~~

13. (Currently amended) The ~~method~~ process of claim 11, further including:

~~combining a piece of the sheet comprised of one of the areas with flowers in a package, and shipping the package wherein the shipping the package does not include shipping the packing list with the package.~~

14. (Currently amended) The ~~method~~ process of claim 2, further including:

~~combining a piece of the sheet comprised of one of the areas with flowers in a package, and shipping the package wherein the shipping the package does not include shipping the packing list with the package.~~

15. (Currently amended) The ~~method~~ process of claim 1, wherein the sheet includes the customizable component is comprised of, and the customizable

component comprises an ornamental graphic specified by the user.

16. (Currently amended) The ~~method~~ process of claim 12, wherein the ~~customizable component is comprised of text~~ customizable component is printed on preexisting art work.

17. (Currently amended) ~~Article-product~~ produced by the process of any one of claims 1-16.

18. (Currently amended) A ~~method~~ process including:
forming multiple parts from a sheet, the parts including at least two of a packing list, a consumer ordering system-customizable component, and a shipping sheet;
separating the parts prior to
~~combining one of the at least two parts with a package; and~~
shipping the a package with the shipping sheet part, but not all of the parts,
located on an outside portion of the package during the shipping.

19. (Currently amended) The ~~method~~ process of claim 18, wherein the ~~sheet is integral during said printing the at least two of a packing list, a customizable component, and a shipping sheet~~ the shipping does not include shipping the packaging list part with the package.

20. (Currently amended) The ~~method~~ process of claim 19, wherein the ~~sheet is not integral during said printing the at least two of a packing list, a customizable component, and a shipping sheet~~ wherein the shipping includes shipping the customizable

component part within the package.

21. (Currently amended) ~~The method process of any one of claims 1-16,~~
18-20, 22-23, 25-26, 2849, wherein the printing is facilitated by a TCP/IP communication,
and wherein the packing list is printed comprising a type of flower.

22. (Currently amended) ~~The method of claim 20, wherein the printing is~~
~~facilitated by a TCP/IP communication. A process comprising:~~

forming a singular sheet component means for carrying out a shipment, the
components comprising at least two of a waybill component, a packing list component, and a
customizable component; wherein

_____ if one of the at least two components includes the waybill component,
printing a means for communicating waybill information on the waybill component,

_____ if one of the at least two components includes the packing list
component, printing a means for communicating packing list information on the packing list
component, and

_____ if one of the at least two components includes the customizable
component, printing a means for communicating a user-customized component on the
customizable component area.

23. (Currently amended) ~~The method process of claim 22 48,~~ wherein the
at least two parts include the shipping sheet, and the shipping sheet designates goods in the
package components comprise all said components, and further including separating the
components prior to shipping a package of goods specified by the packing list information but
not shipping the packing list component with package.

24. (Previously presented) A sheet produced by the process of any one of claims 18-20, 22-23, 28.
